Hazardous Materials and International Dangerous Goods

UPS will accept domestic Air Dangerous Goods shipments prepared under Department of Transportation (DOT) Title 49 of the Code of Federal Regulations (49 CFR) or the International Air Transport Association (IATA) regulation sets. The domestic Hazardous Materials and International Dangerous Goods (IDG) functionality is integrated into the current version of WorldShip® software. Contact the Hazardous Materials Support Center at 1-800-554-9964 for more information.

Select Hazardous Materials, as defined and regulated under 49 CFR, and Dangerous Goods, as defined under the International Civil Aviation Organization (ICAO) and published in the IATA "Dangerous Goods Regulations," are accepted for transportation only as a contractual service domestically within and between all 50 states and Puerto Rico, and internationally within or between defined service areas. A separate contract is required to ship Cargo Aircraft Only (CAO) quantities for classes 1-8 (contact the Hazardous Materials Support Center at 1-800-554-9964 for more information).

Setting Up Service for Hazardous Materials and Dangerous Goods

To receive Hazardous Materials or Dangerous Goods service, including UPS® Standard to Canada, the shipper must have a Scheduled Pickup account and agree to the provisions set forth in the online "UPS Dangerous Goods Agreement Checklist" or an approved prior domestic or international agreement or have these same provisions incorporated into their existing customized contract.

The maximum size per domestic, export or import package is 165 inches in Length plus Girth [(2 x Width) + (2 x Height)] combined. The maximum size per UPS® Simple Rate package is 1,728 cubic inches. For irregularly shaped packages, refer to page 20 for instructions. UPS Worldwide Express Freight Midday and UPS Worldwide Express Freight pallets are subject to maximum size restrictions (which vary by origin and destination) as set forth at ups.com/wwefmaxdimweight. Prior approval is required to ship UPS Worldwide Express Freight Midday and UPS Worldwide Express Freight shipments exceeding maximum size and weight restrictions. There are no maximum size restrictions for UPS Express Critical packages.

Maximum Declared Values

Shippers are prohibited from shipping, and UPS does not accept for transportation, packages having a value of more than $50,000.00, except for a package eligible for the Enhanced Maximum Declared Value of $70,000.00 per package, as set forth in the "UPS Tariff/Terms and Conditions of Service – United States" available at ups.com/termsofservice. A package is eligible only if it is a domestic UPS Next Day Air® delivery service shipment, is tendered pursuant to shipper's Scheduled Pickup service, is processed for shipment using a UPS Shipping System (declarations of value on paper source documents are not eligible) and does not contain hazardous materials or a perishable commodity. For UPS Worldwide Express Freight Midday and UPS Worldwide Express Freight services, UPS does not accept for transportation pallets having a value of more than $100,000.00 per pallet. Additionally, more restrictive value limits apply for certain packages and pallets.

Refer to the "UPS Tariff/Terms and Conditions of Service – United States" available at ups.com/termsofservice for more information on maximum allowable values and liability limitations.

Maximum Weight

For domestic package shipments, the maximum actual weight per package is 150 pounds. The maximum actual weight per UPS Simple Rate package is 50 pounds.

For international shipments, the maximum weight of a package may vary by destination or origin. UPS Worldwide Express Freight Midday and UPS Worldwide Express Freight pallets are subject to maximum weight restrictions (which vary by origin and destination) as set forth at ups.com/wwefmaxdimweight. Prior approval is required to ship UPS Worldwide Express Freight Midday and UPS Worldwide Express Freight shipments exceeding maximum size or weight restrictions. There are no maximum weight restrictions for UPS Express Critical packages. Call the UPS International Customer Service Center at 1-800-782-7892 for more information.

Special Packaging Needs

PACKAGE

If you ship the following items, consider their special packaging needs.

Batteries

A variety of batteries are regulated as hazardous materials by the U.S. Department of Transportation (DOT) and International Air Transport Association (IATA). For assistance in determining whether or not your battery shipment is regulated, please call the DOT's Hazardous Materials Information Center at 1-800-467-4922. Batteries requiring shipping papers may only be tendered by contract hazmat shippers. (See the "UPS® Guide for Shipping Ground and Air Hazardous Materials" at ups.com/hazmat.)

Any device with batteries installed must have its on/off switch protected from being activated or have the batteries removed with the terminals protected. Simple devices like flashlights or rechargeable drills can generate a dangerous amount of heat if accidentally activated. Electronic items sent for repair, such as computers and cell phones, should be sent without batteries. For additional information regarding the shipment of batteries and current lithium battery regulations, please refer to ups.com/batteries.

Bundled or Strapped Boxes

Only same-sized boxes may be strapped together. Use a minimum of four crisscrossed bands, two in each direction. An address label must be placed on each box. When strapping boxes together, each box must be strong enough to hold the total weight of the strapped bundle.

For example, if two 15-pound boxes are banded together into a 30-pound package, both components should be in boxes with at least a 30-pound weight capacity. An Additional Handling charge may apply. Refer to page 179 for more information.

Electronic Media

To ship electronic media that contain sensitive personal information (such as personal, financial or health information), we recommend that you do not use an envelope, Letter packaging, UPS Express® Envelope, UPS Express® Envelope – Reusable, UPS Express® Pak or UPS Express® Pad Pak. UPS provides special packaging, the UPS Express® Hard Pak – Secure, which is designed to help you ship sensitive electronic media. Call 1-800-PICK-UPS (1-800-742-5877) or your sales representative for more information.

You can also ship electronic media containing sensitive personal information by packaging it with a duplicate shipping label in an inner container that can be securely sealed. Place the inner container in a new outer corrugated box. Seal all flaps securely. Prior to packaging, mark the electronic media with identifiable information, such as your company name, reference number or your UPS shipping number. Additionally, the shipper should retain a copy of the data and secure the data on the electronic media through encryption or other technological means.

Special Packaging Needs

PACKAGE

Fabric and Wallpaper

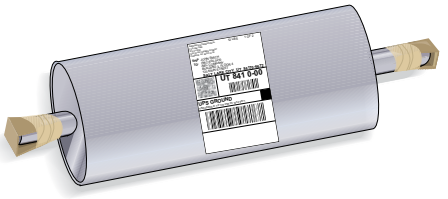

Rolled goods travel best when shipped in corrugated boxes. If a fabric or wallpaper roll is shipped in a bag, UPS recommends a bag with a minimum thickness of six mils. Make sure the bag is tightly wrapped and taped against the roll to reduce the risk of tearing. A tail on an item shipped in a bag must be compressed to the body of the item using tape.

Place the address label on a flat surface of the item being shipped. Place duplicate address labels inside cores or between top layers of material. An Additional Handling charge may apply. Refer to page 179 for more information.

Irregularly Shaped Items and Bare Metals

Tape the address label on a flat surface of the item being shipped. Cover the label with clear tape. Do not use "flying tags" attached by string or metal. Blunt all sharp or protruding edges with taped-on, corrugated cardboard pieces. Protect the surface of the item as needed. An Additional Handling charge will apply. Refer to page 179 for more information.

Large and/or Heavy Packages

Packaging materials need to be evaluated carefully for packages weighing more than 70 pounds.

A UPS Heavy Package sticker is required whenever you ship packages weighing more than 70 pounds. Place the sticker to the right of the address label and write the package's weight in the white box. It also helps to highlight every side of your package with Heavy Package highlight tape. This sends a warning to those who risk lifting your package – both your employees and ours.

Customers with a UPS account can request supplies, free of charge. Order Supplies and Forms by visiting ups.com. Refer to the Large Package Surcharge on page 181 for fees.

Tires

Apply a wide band of pressure-sensitive tape through the center and completely around the body of the tire so that the tape is attached to itself. Attach your address label to the tape band where it covers the tread. Cover the entire label with clear tape. An Additional Handling charge will apply. Refer to page 179 for more information.

If you have highly sensitive or confidential material, UPS Express Critical® shipping offers a same-day service to handle your specialized needs. For more information, please call 1-800-714-8779 or speak with your sales representative.

Packaging Guidelines

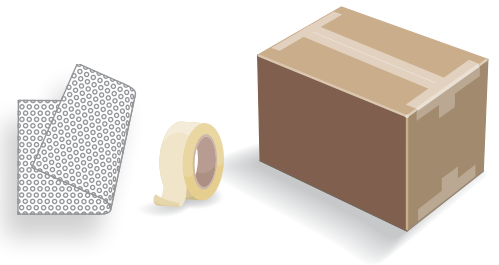

PACKAGE

Proper Packaging

To ensure that proper packaging is used and that contents are adequately and securely packed, wrapped and cushioned for transportation, shippers should:

– Use a new or almost new rigid box with flaps intact
– Wrap all items separately
– Use adequate cushioning material
– Use strong tape designed for shipping
– Never use string or paper overwrap

Additional guidance on proper packaging is available at ups.com under UPS Shipping Guides and Resources.

Proper Labeling

Each package must also be properly labeled with an approved UPS label containing a valid UPS tracking number. Shippers should:

– Securely affix to each package a UPS-issued paper shipping document or label generated through an approved UPS automated shipping system that contains clear, complete delivery and return information, including, among other things, the UPS tracking number, shipper name and address, and consignee name and address
– Place a duplicate address label inside the package
– Remove or conceal any labels, hazardous materials indicators and other previous shipment markings on the box that are no longer applicable

UPS WORLDWIDE EXPRESS FREIGHT® MIDDAY, UPS WORLDWIDE EXPRESS FREIGHT,®
UPS WORLDWIDE EXPEDITED® GROUND FREIGHT AND AIR FREIGHT

Preparing Your Freight Shipment

UPS Worldwide Express Freight Midday and UPS Worldwide Express Freight ("UPS Worldwide Express Freight Services")

UPS Worldwide Express Freight Services are for palletized shipments. Pre-authorization is required for all pallets exceeding maximum size or weight restrictions (which vary by origin and destination) as set forth at ups.com/assets/resources/webcontent/wwef_max_dim.pdf. For UPS Worldwide Express Freight Services, scheduling a pickup or drop-off is required on all shipments through WorldShip,® ups.com shipping and UPS CampusShip® systems, a UPS Ready® solution, UPS® Developer Kit, ups.com or by calling 1-800-782-7892.

Air Freight and UPS Worldwide Expedited Ground Freight

Air Freight and UPS Worldwide Expedited Ground Freight shipments can include combinations of palletized items or boxes that are too large to ship using other UPS services. They can also include multiple non-palletized pieces. UPS will accept freight shipments of any weight; however, minimum weight charges may apply. Pre-authorization is required for Air Freight and UPS Worldwide Expedited Ground Freight shipments that exceed 120 inches in length, 84 inches in width, 76 inches in height or 5,000 pounds in weight.

Palletized Freight

Palletizing freight helps multiple-piece shipments remain together and provides increased protection from damage. Each pallet, including its contents, is considered one piece.

Non-Palletized Freight

Loose items, such as boxes or containers that have not been secured to a pallet, are considered non-palletized freight. Each loose item is considered one piece and can be shipped via Air Freight or UPS Worldwide Expedited Ground Freight services.

Palletizing Your Shipment

Pallets are portable rigid platforms used to consolidate shipments and allow for ease of freight movement. Quality pallets are commonly made of either wood or plastic and can weigh between 20 and 70 pounds. Pallets should be large enough to accommodate the shipment without overhang. Anything overhanging the pallet edges may be damaged from punctures, abrasions and compression.

UPS Worldwide Express Freight Midday and UPS Worldwide Express Freight shipments must be palletized, stackable, able to be lifted by forklift and shrink-wrapped or banded to the pallet.

For Air Freight or UPS Worldwide Expedited Ground Freight shipments, if your non-palletized shipment does not meet the minimum billable weight per piece, consider palletizing prior to UPS pickup.

Step by Step

The following are basic step-by-step instructions for palletizing your freight shipments.

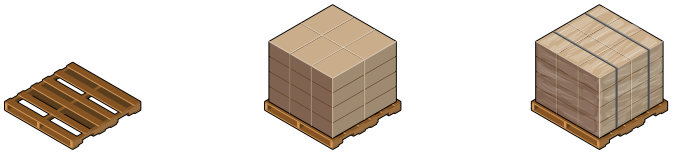

1. Select Pallets.

– Choose pallets large enough to prevent overhang of shipment pieces

– Pallets must be sturdy enough to support the load
- Select pallets with closely spaced pallet deck boards
- Never exceed the rated capacity of your pallet

– Do not select pallets with broken boards or protruding nail heads

Palletizing Your Shipment

1. Select a four-way entry pallet for your freight shipment.
2. Stack boxes in columns. Avoid placing freight beyond pallet edges.
3. Use strapping with stretch wrap to secure boxes to the pallet.

– Pallets with four-way forklift entry are preferred as they help to improve handling and reduce damage to the shipment

2. Stack Boxes on Pallet.

For shipments that contain boxes or stackable pieces:

– Ensure cartons are new and of proper strength to withstand stacking

Many The UPS Store® locations can handle LTL freight packaging and shipping for you. Visit theupsstore.com for more information.

Packaging Guidelines

UPS WORLDWIDE EXPRESS FREIGHT® MIDDAY, UPS WORLDWIDE EXPRESS FREIGHT,®
UPS WORLDWIDE EXPEDITED® GROUND FREIGHT AND AIR FREIGHT

Step by Step (continued)

– Securely close, staple and/or seal cartons

– Protect product from internal vibration with proper amounts of dunnage within cartons; no void areas/spaces between product or on top of carton

– Remove old labels from shipping cartons and product

– Affix labels, with complete address information for the shipper and the consignee, to each piece

– Align boxes in columns, corner to corner, for the greatest stacking strength

– Avoid interlocking or rotating layer patterns

– Do not align corners over the spaces between pallet deck boards

– Boxes should not extend past the pallet edges

– Do not pyramid the boxes; keep the top layer flat to prevent damage from top loads

– Use a slip sheet under the load and every third layer when possible to help distribute the weight evenly and protect the bottom layer

3. Secure Shipment to Pallet.

– Use a minimum 60-gauge stretch wrap, five revolutions recommended; tie to pallet and across top to prevent shifting

– For Air Freight and UPS Worldwide Expedited Ground Freight, label all handling units with shipper/consignee information and PRO Numbers (at minimum all four vertical sides, interior and exterior of the stretch wrapping); use markers if having adhesion issues

– To ensure stability, corner boards and banding are recommended

– Use three-way locking, nailed corners (not staples) on crates; angle board must extend from the deck board to the top of the pallet load

– Insert layers of cardboard between layers of freight to absorb vibration; distribute the weight evenly

4. Label Shipment.

– For UPS Worldwide Express Freight Midday and UPS Worldwide Express Freight shipments, apply labels to each side of the pallet and on top of the pallet – each label should have telephone numbers and complete address information, including postal code of the shipper and the consignee

– For Air Freight and UPS Worldwide Expedited Ground Freight, label each pallet with telephone numbers and complete address information, including postal code of the shipper and the consignee

– Ensure information on the Bill of Lading (BOL) matches the shipment

– Indicate in proper location on the BOL and check contract/tariff for liability limits if excess declared value is needed

– Do not pyramid, ship or accept prohibited items or freight that overhangs the pallet

Protecting Your Palletized Shipment from Damage

Solution	Description
Corner/Edge Boards	– Increase vertical stacking strength, prevent damage to corner edges and stabilize the load – Should extend to the full height and length of the load and should be used on all corners
Strapping or Banding	– Prevents pieces from getting lost or separated from the load – Should be drawn tightly to the load, possibly requiring running it underneath the top deck boards of the pallet
Stretch Wrapping	– Use as an effective way to keep all pieces of a shipment together – Should first be applied around the pallet and continued upward around the load – Must be tight to prevent load shifting – Capture the pallet when wrapping bottom layer – Designed to stabilize the load, not to secure it to the pallet – Strapping or banding should be used in conjunction with stretch wrap to secure the load to the pallet
Top/Bottom Load Protector	– Layers of corrugated fiberboard or heavy paperboard – Use to help evenly distribute the weight of shipments that can be stacked upon one another

Packaging Guidelines

UPS WORLDWIDE EXPEDITED® GROUND FREIGHT AND AIR FREIGHT

Preparing Non-Palletized Freight

If you do not plan to secure your shipment to pallets, follow the steps below.

1. Ship freight in corrugated boxes (avoid reusing boxes), crates or shipping containers.

2. Use a container strong enough to support the weight of contents.

3. Use at least two inches of appropriate cushioning material to protect internal items from each other and the corners, sides, top and bottom of containers. Appropriate cushioning material would include corrugated fiberboard, multiple layers of folded newspaper, styrofoam sheets, packing blankets, etc.

4. Reinforce edges to protect from bending.

5. Securely seal closures and seams with reinforced tape.

6. Label each piece with telephone numbers and complete address information, including postal code of the shipper and the consignee.

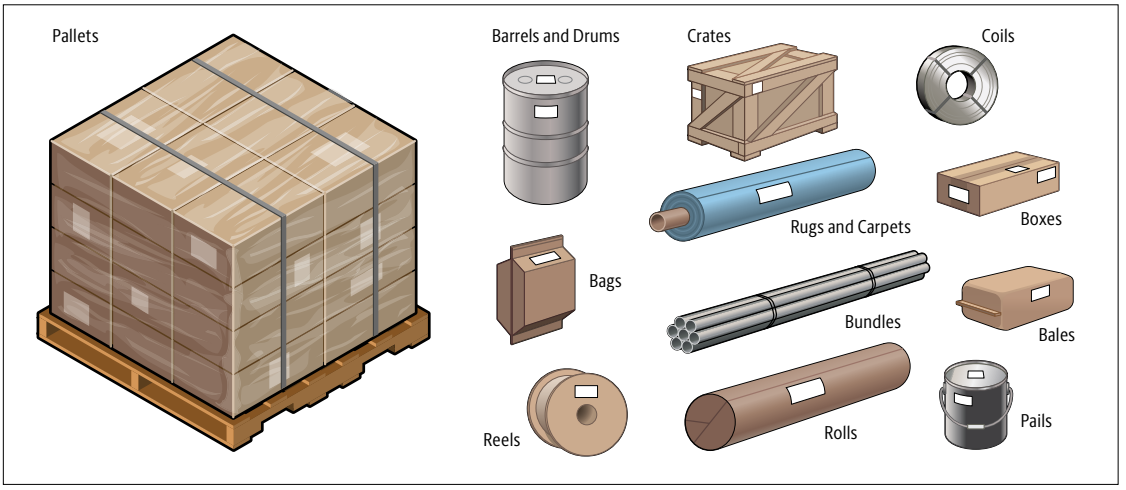

Preparing for Pickup

Your freight pickup request is initiated when you Create a Shipment for freight using ups.com shipping, WorldShip® or UPS® Forwarding Hub shipping tools.

Some Air Freight and UPS Worldwide Expedited Ground Freight shipment pickup requests require pre-authorization.

How to Label

Each piece of palletized or non-palletized freight must be clearly marked with telephone numbers and complete address information, including postal code of the shipper and the consignee. Indicate on freight labels if any pieces require C.O.D. service.

Note: UPS Worldwide Express Freight® Services do not accept non-palletized freight shipments.

Determine the Weight and Size

PACKAGE

For All Domestic and International Shipments

The "Determine the Weight and Size" information on this page and the next applies to package shipments only. For information on how to determine the weight and size for UPS Worldwide Express Freight® Midday and UPS Worldwide Express Freight® shipments, refer to page 20. For information on how to determine the weight and size for UPS® Simple Rate shipments, refer to page 103.

Shipping rates are based on package weight and size (explained below and on the following page) and origin-to-destination distance (refer to page 30 for Domestic, Export and Import).

Billable weight is the weight used to calculate the rate. For domestic and international services, the billable weight will be the greater of the dimensional weight compared to the actual weight.

How to determine billable weight:

1. Determine actual weight.

Actual weight is the package weight rounded up to the next whole pound.

Use a scale to determine the weight of the package. Round any fraction of a pound to the next whole pound for UPS Express® Envelopes (Letters) over eight ounces and all other packages.

2. Determine dimensional weight.

Dimensional weight reflects package density, which is the amount of space a package occupies in relation to its actual weight. Dimensional weight may apply to all UPS domestic and international package services.

Determine the package dimensions in inches. For each dimension, measure at the longest point, rounding each fractional measurement up to the nearest whole number (for example, 1.1 will be considered 2). The minimum measurement for each dimension is 1 inch.

Multiply the package length (longest side of the package) by the width by the height. The result is the cubic size in inches.

Divide the cubic size in inches by 139 to determine the dimensional weight in pounds. Increase any fraction to the next whole pound.

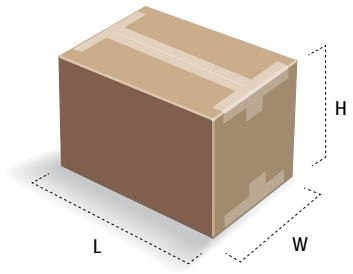

3. Determine billable weight.

Compare the package's actual weight to its dimensional weight. The greater of the two is the billable weight and should be used to calculate the rate.

For multiple-package shipments eligible for shipment pricing, total the billable weight of all packages in the shipment.

Notes:

- Shipment pricing is not available for a service unless specifically noted.
- For information on how to determine the rate applicable to UPS® Simple Rate shipments, see pages 103-104 and visit ups.com/simplerate.

Dimensional Weight Calculation

$$\left[\begin{array}{c}\text{Dimensional Weight} \\ \text{in Pounds}\end{array}\right] = \frac{L \times W \times H}{139}$$

L = Length in inches
W = Width in inches
H = Height in inches

Determine the Weight and Size

PACKAGE

For All Domestic and International Shipments (continued)

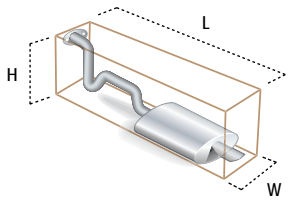

Additional Information on Determining Weight and Size.

– **Letter rates** apply for domestic and international documents, correspondence and electronic media shipments that do not exceed eight ounces sent in a UPS Express® Envelope. Domestic Letters greater than eight ounces will be billed by weight (rounded up to the next whole pound). Export Letters greater than eight ounces and up to two pounds will be billed at UPS Express® Pak rates. Export Letters greater than two pounds and import Letters greater than eight ounces will be billed by weight (rounded up to the next whole pound).

– **UPS Express Pak rates** apply for export shipments that weigh two pounds or less, do not exceed $100.00 in customs value and UPS Express Pak is selected at the time of shipping.

– **Irregularly Shaped Packages:** If the package has a bulge or is irregularly shaped, measure the length, width and height of the package at its extreme points, which may include the bulge or irregular aspects of the package.

Treat the irregularly shaped package as if it were in a regular rectangular box. Measure the length, width and height of the package from its extreme points.

– **Items Shipped in Bags:** *Shape* – When multiple items are shipped in a flexible container (e.g., burlap or plastic bag), the package measurements will be determined when the exterior is at rest. As this shape will differ from placement to placement, cubic size or package measurements will be made at the sole discretion of UPS.

Tails – A tail on an item shipped in a bag should be measured for the amount of space it takes up in a reasonably compressed fashion. Any tail that is created by placing an item in a bag must be compressed and taped to the body of the item.

– Packages that exceed UPS weight and size limits are not accepted for transportation. If found in the UPS system, they are subject to an Over Maximum Limits charge. UPS reserves the right in its sole and unlimited discretion to return such packages to the shipper at the shipper's expense. Refer to page 181 for more information. For Maximum Weight service restrictions, refer to page 8. For shipments over 150 pounds other than UPS Worldwide Express Freight® Services, refer to pages 105-108 for Air Freight and page 16 for UPS Worldwide Expedited® Ground Freight for more information.

– A **Large Package Surcharge** may apply to domestic and international shipments.

For domestic shipments, a package is considered a "Large Package" when its Length (longest side of the package) plus Girth [(2 x Width) + (2 x Height)] combined exceeds 130 inches or its Length exceeds 96 inches.

For international shipments, a package is considered a "Large Package" when its Length (longest side of the package) plus Girth [(2 x Width) + (2 x Height)] combined exceeds 130 inches.

Large Packages are subject to a minimum billable weight of 90 pounds. See page 181 for applicable rates. An Additional Handling charge will not be assessed when a Large Package Surcharge is applied.

– Shippers are responsible for providing accurate and complete shipment information on the shipping document or in the automated processing system used, including service selected, number, weight and dimensions of packages. UPS reserves the right to audit any package and/or invoice to verify service selection, package dimensions or weight and applicability of any charges. As part of that audit, UPS may weigh and measure any package tendered to UPS using any method UPS deems appropriate, including, but not limited to, multi-dimensional measuring devices. If any aspect of the shipment information provided by the shipper is incomplete or incorrect as determined by UPS in its sole and unlimited discretion, UPS may in its sole and unlimited discretion adjust charges at any time.

– Package dimensions may change during transit, which may affect dimensional weight and dimensions used to assess size-related charges, potentially resulting in shipping charge corrections. Improper packaging is more likely to result in the alteration of a package's dimensions.

Follow the instructions on this page and the previous page to determine the billable weight for your package shipments. Refer to page 21 for UPS Worldwide Express Freight Services.

Notes:

– Size limits indicated by a box manufacturer may not reflect exterior dimensions of a package, including where a package may have bulges or otherwise may not be uniform across each plane, and should not be used as a substitute for actual length, width and height measurements in determining dimensional weight.

WorldShip®, ups.com shipping, UPS CampusShip®, UPS Ready®, UPS marketplace shipping solutions and applications available in the UPS® Developer Kit will automatically calculate dimensional weight when you enter the package weight and dimensions.

Determine the Weight and Size

To Destinations Worldwide

UPS WORLDWIDE EXPRESS FREIGHT® MIDDAY AND UPS WORLDWIDE EXPRESS FREIGHT®

For International Palletized Shipments

Shipping rates are based on the shipment weight, including the weight of the pallet and size and origin-to-destination distance (refer to page 30 for Export and Import).

Billable weight is the weight used to calculate the rate. The billable weight will be the greater of the dimensional weight as compared to the actual weight.

How to determine billable weight:

1. Determine actual weight.

Actual weight is the weight of the items on the pallet and the weight of the pallet, rounded up to the next whole pound.

Use a scale to determine the weight. Round any fraction of a pound to the next whole pound.

2. Determine dimensional weight.

Dimensional weight reflects pallet density, which is the amount of space a pallet occupies in relation to its actual weight. Dimensional weight may apply to all UPS Worldwide Express Freight Midday or UPS Worldwide Express Freight shipments.

Determine the pallet dimensions in inches. For each dimension, measure at the longest point, rounding each measurement to the nearest whole number (for example, 1.00 to 1.49 will be considered 1, and 1.50 to 1.99 will be considered 2). The minimum measurement for each dimension is 1 inch.

Multiply the pallet length by the width and by the height. The result is the cubic size in inches.

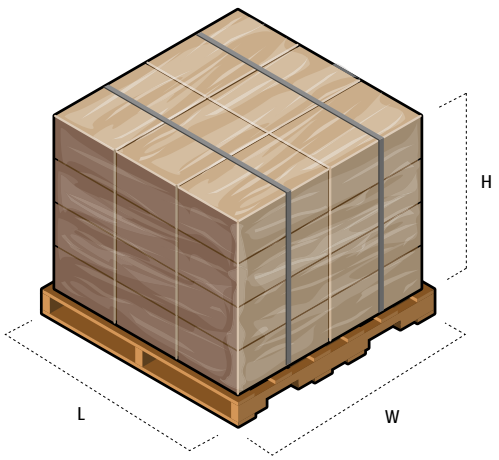

For export and import shipments, divide the cubic size in inches by 139 to determine the dimensional weight. Increase any fraction to the next whole pound.

3. Determine billable weight.

Compare the pallet's actual weight to its dimensional weight. The greater of the two is the billable weight and should be used to calculate the rate.

Additional Information on Determining Size and Weight.

– Pallets that exceed maximum size or weight restrictions (which vary by origin and destination) as set forth at ups.com/assets/resources/webcontent/wwef_max_dim.pdf require prior approval, and are subject to an Oversize Pallet Handling Surcharge. Refer to page 181 for more information.

H = Height in inches

Example of Billable Weight Calculation

Customer has a shipment with three (3) pallets weighing 600 pounds, 800 pounds and 1,000 pounds. All pallets are the same size with the following dimensions: 48 in. x 40 in. x 60 in.

1. Determine actual weight.

Actual Weight = 600 lbs. + 800 lbs. + 1,000 lbs. = 2,400 lbs.

2. Determine dimensional weight.

Pallet Dimensional Weight = $\frac{48 \text{ in.} \times 40 \text{ in.} \times 60 \text{ in.}}{139}$ = 829 lbs.

Shipment Dimensional Weight = 829 lbs. + 829 lbs. + 1,000 lbs. = 2,658 lbs.

3. Determine billable weight.

Shipment Billable Weight = 2,658 lbs.

How to Determine Billable Weight*

Compare the freight shipment's minimum billable weight, actual weight and dimensional weight. The greatest of the three is the billable weight and should be used to calculate the rate.

1. Determine minimum billable shipment weight.*
   – Minimum billable weight for loose items is the greater of minimum weight per shipment multiplied by the minimum weight per piece as set forth in the table below.

U.S. 48		
Service	Minimum Weight per Piece	Minimum Weight per Shipment
UPS Next Day Air® Freight **UPS Next Day Air® Freight NGS** **UPS 2nd Day Air® Freight** **UPS 2nd Day Air® Freight NGS** **UPS 3 Day Freight®** **UPS 3 Day Freight® NGS**	20 Pounds	151 Pounds
UPS Worldwide Expedited Ground Freight	N/A	551 Pounds

Alaska/Hawaii		
Service	Minimum Weight per Piece	Minimum Weight per Shipment
UPS Next Day Air Freight NGS **UPS 2nd Day Air Freight NGS**	20 Pounds	151 Pounds

**The minimum billable shipment weight applies to all Air Freight services within and between the U.S., Canada and Puerto Rico. For UPS Worldwide Expedited Ground Freight, use minimum weight per shipment as defined above. For UPS Air Freight Direct® and UPS Air Freight Consolidated® services, a minimum shipment dollar amount is applied. Refer to the "UPS Air Freight Terms and Conditions of Contract for UPS Air Freight Services in the United States, Canada and International" at UPS Supply Chain Solutions, ups.com/freighttermsofservice or call 1-800-443-6379.*

2. Determine actual weight and round up any fraction of a pound or kilogram to the next whole pound or kilogram.

3. Determine dimensional weight.

For each dimension, measure at the longest point, rounding each measurement to the nearest whole number. The minimum measurement for each dimension is 1 inch. Multiply the shipment length by the width by the height. The result is the cubic size. Divide the cubic size by the dimensional weight factor located in the matrix below to determine the dimensional weight.

U.S. 48 and Alaska/Hawaii				
Service	Origin	Destination	Dimensional Weight Factor (Inches/Pounds)	Dimensional Weight Factor (Centimeters/Kilograms)
UPS® Air Freight Premium Direct	All	All	139	5,000
UPS Air Freight Direct **UPS Air Freight Consolidated**	All	All	166	6,000
UPS Next Day Air Freight **UPS Next Day Air Freight NGS** **UPS 2nd Day Air Freight** **UPS 2nd Day Air Freight NGS** **UPS 3 Day Freight** **UPS 3 Day Freight NGS**	PR, CA and U.S.	PR, CA and U.S.	139	5,000
UPS Worldwide Expedited® Air Freight	U.S.	MX	139	5,000
	MX	U.S.		
UPS Worldwide Expedited Ground Freight	U.S.	MX		
	MX	U.S.		

To convert metric measurements into pounds, multiply the result by 2.20462. To convert imperial measurements into kilograms, multiply the result by 0.453592. Increase any fraction to the next whole pound or kilogram.

The chart on the next page provides examples of billable weight calculations for Air Freight shipments.

Important: In addition to determining the billable weight of a package, the destination zone is also needed to determine the rate for each domestic service option except UPS Express Critical®.

Notes:

– WorldShip® or UPS CampusShip® shipping systems, ups.com shipping, the UPS® Developer Kit or a UPS Ready® solution will automatically determine the zone for you.

– For Air Freight destinations within the U.S., and from the U.S. to Canada and Puerto Rico, refer to the rate charts on page 106 to determine what UPS service to reference, then refer to the zone charts at ups.com/dailyratezones for the actual zones.

– Determine the zone for your shipment from the appropriate charts.

– Service to and from points in zone 26 may require one or more additional days.

– A dash (-) means service is not available.

UPS® Simple Rate

U.S. 48 and Alaska/Hawaii – Domestic

PACKAGE

Preparing a UPS Simple Rate Shipment

UPS Simple Rate offers flat-rate pricing between the U.S. 50 states. The applicable rate is determined by package size and service option. Certain standard surcharges do not apply. Separate UPS Simple Rate pricing applies to shipments originating in or destined to Alaska and Hawaii.

Maximum Weight and Size

The maximum actual weight per UPS Simple Rate package is 50 pounds. The maximum size per UPS Simple Rate package is 1,728 cubic inches.

Service Options

Choose from four service options: UPS Next Day Air Saver,® UPS 2nd Day Air,® UPS 3 Day Select® and UPS® Ground. UPS 3 Day Select and UPS Next Day Air Saver are not available for UPS Simple Rate shipments destined to Alaska and Hawaii.

Determining the UPS Simple Rate Package Size

Follow the steps below to determine the package's UPS Simple Rate size.

1. Package the item in a box or poly mailer.

UPS Simple Rate is designed to be used with the shipper's own box or poly mailer.

2. Measure the package dimensions in inches.

For each dimension, measure at the longest point, rounding each fractional measurement up to the nearest whole number (for example, 1.1 will be considered 2). The minimum measurement for each dimension is 1 inch.

3. Calculate the package size in cubic inches.

Multiply the package length (longest side of the package) by the width by the height. The result is the size in cubic inches.

4. Determine the package's UPS Simple Rate size.

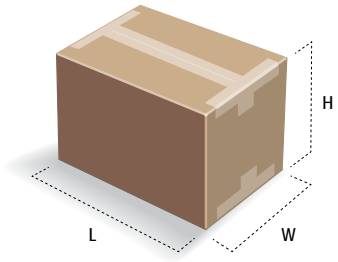

Determine the UPS Simple Rate size, according to the package's size in cubic inches, using the chart below.

Shipping a UPS Simple Rate Package

Prepare and process UPS Simple Rate shipments at ups.com/simplerate or through another UPS automated shipping system, where available. Shippers do not need to open an account or enter into a contract to use UPS Simple Rate.

Pickup and Drop-off Availability

All standard pickup and drop-off options are available for use with UPS Simple Rate shipments. Refer to pages 26-27 for details.

Shipment Pricing

U.S. 48 and Alaska/Hawaii – Export

UPS Worldwide Express Plus,® UPS Worldwide Express,® UPS Worldwide Express Freight® Midday, UPS Worldwide Express Freight,® UPS Worldwide Saver,® UPS Worldwide Expedited® and UPS® Standard ⊖

Shipment pricing is advantageous because rates are based on the total weight of a shipment, not the sum of the rates for each package in a shipment.

What Qualifies

1. The shipment consists of multiple packages, using the same service, shipped on the same day to a single consignee.

2. For shipments processed with WorldShip® or UPS CampusShip® shipping systems, ups.com shipping, the UPS® Developer Kit or a UPS Ready® solution that supports full international service, or a UPS Worldwide Services Waybill. **Note:** For shipments processed with UPS® Developer Kit – Shipping API, in order to obtain the best rate, customers are responsible for aggregating shipments for shipment pricing prior to requesting labels (UPS® Developer Kit – Shipping API does not run End of Day).

What Does Not Qualify

Shipment pricing does not apply to UPS Express® Envelopes, UPS Express® Paks, the UPS® 10 KG Box, the UPS® 25 KG Box or packages recorded in a UPS Shipping Record book; they are each considered separate shipments.

Rates

Rates are based on the total billable weight of all packages in the shipment. Compare each package's actual weight with its dimensional weight. The greater of the two is the billable weight and should be used to calculate the rate. For multiple-package shipments, total the billable weight of all packages in the shipment. Refer to pages 18-19 for instructions on calculating dimensional and billable weight.

If the payer of the shipping charges is located in the origin country, the shipment will be charged the export rate (Origin Country Export Rates). When the payer of the shipping charges is located in the destination country, the shipment will be charged the import rate (Destination Country Import Rates). If the destination country does not have import rates, the shipment will be charged the export rate (Origin Country Export Rates). When the payer of the shipping charges is located in a third country (neither origin nor destination country), the shipment will be charged the Origin Country Export Rates, except as otherwise agreed to by UPS and the contracting party.

For shipments weighing 150 pounds or less, locate the rate for the total weight of the shipment on the appropriate rate chart.

For shipments weighing more than 150 pounds, multiply the total weight (rounded to the next whole pound) by the appropriate price per pound. The amount billed will be the result of this calculation or the minimum rate shown, whichever is greater.

For a multiple-package UPS Standard shipment (not available to/from Alaska/Hawaii), the minimum charge will be based on an average weight of 15 pounds per package.

Customs Brokerage

For UPS Worldwide Express Plus, UPS Worldwide Express, UPS Worldwide Express Freight Midday, UPS Worldwide Express Freight, UPS Worldwide Saver, UPS Worldwide Expedited and UPS® Standard to Mexico, rates include routine, in-house customs clearance by UPS Customs Brokerage. Additional charges will apply if customs clearance is performed by customs brokerage offices other than those designated by UPS for clearing the services listed here.

Customs clearance for the services listed is provided by the UPS Customs Brokerage offices designated by UPS for handling package customs clearance. Other UPS Supply Chain Solutions customs brokerage offices charge fees for clearance of packages and freight.

For UPS® Standard to Canada, charges for customs clearance are not included in the rate. UPS will provide Customs Brokerage Services, unless otherwise specified by the importer. Customs brokerage charges, duties and taxes will be billed to the importer, unless otherwise indicated by the shipper. Canada brokerage rates are available at ups.com/cacustomsclearance.

Shipment Pricing

U.S. 48 and Alaska/Hawaii – Import

UPS Worldwide Express Plus,® UPS Worldwide Express NA1,® UPS Worldwide Express,® UPS Worldwide Express Freight® Midday, UPS Worldwide Express Freight,® UPS Worldwide Saver,® UPS Worldwide Expedited,® UPS 3 Day Select® from Canada ⊖ and UPS® Standard ⊖

Shipment pricing is advantageous because rates are based on the total weight of a shipment, not the sum of the rates for each package in a shipment.

What Qualifies

1. The shipment consists of multiple packages, using the same service, shipped on the same day to a single consignee.

2. For shipments processed with WorldShip® or UPS CampusShip® shipping systems, ups.com shipping, the UPS® Developer Kit or a UPS Ready® solution that supports full international service or a UPS Worldwide Services Waybill. **Note:** For shipments processed with UPS® Developer Kit – Shipping API, in order to obtain the best rate, customers are responsible for aggregating shipments for shipment pricing prior to requesting labels (UPS Developer Kit – Shipping API does not run End of Day).

What Does Not Qualify

Shipment pricing does not apply to UPS Express® Envelopes, the UPS® 10 KG Box or the UPS® 25 KG Box; they are each considered separate shipments.

Rates

Rates are based on the total billable weight of all packages in the shipment. Compare each package's actual weight with its dimensional weight. The greater of the two is the billable weight and should be used to calculate the rate. For multiple-package shipments, total the billable weight of all packages in the shipment. Refer to page 19 for instructions on calculating dimensional weight.

If the payer of the shipping charges is located in the origin country, the shipment will be charged the export rate (Origin Country Export Rates).

When the payer of the shipping charges is located in the destination country, the shipment will be charged the import rate (Destination Country Import Rates). If the destination country does not have import rates, the shipment will be charged the export rate (Origin Country Export Rates). When the payer of the shipping charges is located in a third country (neither origin nor destination country), the shipment will be charged the Origin Country Export Rates, except as otherwise agreed to by UPS and the contracting party.

Unless otherwise specified at the time of shipping, shipping charges are billed to the shipper. In the event of non-payment by consignee or third party, the charges are billed to the shipper. Refer to page 202 for more information on billing options.

For shipments weighing 150 pounds or less, locate the rate for the total weight of the shipment on the appropriate rate chart.

To determine the rate for a shipment weighing more than 150 pounds, multiply the total weight (rounded to the next whole pound) by the appropriate price per pound as shown under the shipment weight designations above 150 pounds. The amount billed will be the result of this calculation or the minimum rate shown, whichever is greater.

For a multiple-package UPS Standard shipment, the minimum charge will be based on an average weight of 15 pounds per package.

All rates for UPS international services, except UPS® Standard from Canada, include routine, in-house customs brokerage. For more information on customs brokerage for import shipments, refer to pages 160-161.

Certain domestic packages are eligible for the enhanced maximum declared value of $70,000.00, subject to restrictions set forth in the "UPS Tariff/Terms and Conditions of Service – United States" available at ups.com/termsofservice and also set forth in "Maximum Declared Values" on page 9. – Declarations of value from $100.01 to $300.00 are subject to a charge of $5.10. For example, a declaration of $950.00 value incurs a charge of $17.00 (10 times $1.70). – For international shipments with a declared value of more than $50,000.00, multiply the total declared value by the rate to determine the declared value charge for the shipment. – For packages tendered to a UPS driver with a declared value amount of more than $1,000.00, the shipper must retain a high-value shipment summary signed by the driver. The UPS Shipping System provides this form when the shipping label is requested. – Declared value charges can be included in charges billed to receivers or third parties. – Refer to the "UPS Tariff/Terms and Conditions of Service – United States" available at ups.com/termsofservice for details, including limits and exclusions.	– Value from $0.00 to $100.00 No charge – Value from $100.01 to $300.00 $5.10 – Value over $300.00, charge for each $100.00 (or portion of $100.00) of the total value declared (from $0.00 to total value declared) $1.70 – For international shipments with a declared value of more than $50,000.00 $0.017 times the declared value
Declared Value for Carriage – UPS® Package Shield	– When displayed to a shipper processing packages through WorldShip, ups.com shipping or select other UPS Ready solutions, or by written agreement, UPS Package Shield applies as the shipper's opportunity to declare value for carriage (estimated release fall 2026). – Without a declaration of value, UPS Package Shield does not apply, and UPS's liability for loss or damage is limited to $100 for each domestic package or international shipment, or to each pallet in a UPS Worldwide Express Freight Midday or UPS Worldwide Express Freight shipment, per standard Declared Value for Carriage. – Declarations of value incur a charge for each $100.00 (or portion of $100.00) of the total value declared, including the first $100.00. For example, a declaration of $950.00 value incurs a charge of $17.00 (10 times $1.70). – UPS Package Shield provides enhanced protection of standard Declared Value for Carriage: • Porch Protection: UPS is responsible if it does not obtain a signature at delivery and shipment is stolen before receiver takes possession. • Invoice Value: UPS will apply invoice amount over replacement cost or actual cost in determining maximum liability. – Refer to the "UPS Tariff/Terms and Conditions of Service – United States" available at ups.com/termsofservice for details, including limits and exclusions.	– No declaration UPS Package Shield not applicable – No charge – Charge for each $100.00 (or portion of $100.00) of the total value declared (from $0.00 to total value declared) $1.70 – For international shipments with a declared value of more than $50,000.00 $0.017 times the declared value

UPS Broker of Choice®

With UPS Broker of Choice service, importers select their own alternate customs broker for customs clearance of their UPS international shipments. This service is available for all UPS international shipments, except for UPS Standard service.

This contractual, fee-based service allows the importer to utilize UPS for international shipping needs, with an alternate broker providing customs clearance. The importer may use UPS Broker of Choice service for specific commodities or product lines, while continuing to utilize UPS brokerage expertise for others.

UPS technology makes shipment information and documentation (e.g., the commercial invoice) available to the designated broker at the time of export. This enables customs clearance in a timely manner.

Importers have two options:
1. UPS Broker of Choice OnSite keeps shipments in UPS's possession while the importer's customs broker completes customs clearance procedures prior to UPS completing delivery of the shipment.

2. UPS Broker of Choice OffSite moves shipments in-bond directly to a customs-controlled (bonded) warehouse (at the importer's direction), where the importer's customs broker completes the customs clearance procedures. The UPS transport is completed upon delivery of the shipment to the warehouse. Refer to page 195 for fees.

Note: For information on UPS Customs Brokerage Services for your freight needs, including the Customs Brokerage and Freight Forwarding Terms and Conditions, please visit ups.com/supplychainsolutions.

UPS® FTZ Facilitator

With UPS FTZ Facilitator service, importers and exporters have the ability to use UPS to transport international shipments in-bond to and from a global Free/Foreign Trade Zone (FTZ). This service is available for all UPS international shipments, except for UPS® Standard service.

This contractual, fee-based service allows the shipment of goods to and from an FTZ, while retaining the benefits of UPS's transportation network. Using UPS as a single source enables importers and exporters to increase visibility and tracking, and reduce the chance for errors and costs associated with utilizing multiple transportation providers.

UPS technology enables shipment information and documentation (e.g., the commercial invoice) available to the customer, customer's broker and FTZ operator at the time of export. This enables prompt processing of the FTZ entry.

Importers will choose UPS FTZ Facilitator import service to direct shipments to be delivered in-bond to a designated FTZ rather than being cleared through customs.

Exporters will choose UPS FTZ Facilitator export service to ship goods in-bond from an FTZ to an international destination. Refer to page 195 for fees.
